ERGONOMICS START WITH THE VERY FIRST STEP.

The ergonomic entry design of the MAN TGM and TGL controls that can be easily accessed from outside the trucks ensures a pleasant start to the day. As the entrance get into the vehicle in an upright position. The access implemented according to individual needs. ladder is designed as a stair so you have all steps in view. On entering the vehicle, the design ensures extra Once in the cab, you have a variety of driver's seats to comfort, and it offers better safety, too. Thanks to entry choose from, each ready to welcome your particulighting, the steps and surroundings are visible at any time of day and in any weather conditions as soon as you options for drivers of all sizes. The passenger seat as well open the door. For all this, we didn't forget the little things either: an entrance optimised especially for off-road work and that features steps with a non-slip surface and a lattice structure, washable interior door panelling and a to its Cinema function, it can simply be folded away. compressed air supply. This way sand, mud and gravel can quickly be shown back out the door. In addition to ensuring your truck makes a positive impression visually, breaks feel all that much better, too.

specifically to help you avoid getting in and out when you

vehicle. Depending on your configuration, they come is positioned in the middle of the door area, the driver can pre-programmed with the key functions or can even be

> lar build. There is a larger range of backrest adjustment features highly ergonomic design and its own range of individual adjustment possibilities. The Vario seat is especially space-saving: when it's not needed, thanks

Even the steering wheel has been given greater flexibility: for the resting position, the steering wheel can be tilted forward to a horizontal position by the driver, and in action as well, it can be given as steep an angle as That said, we developed the MAN EasyControl system that of an average passenger car. The result is a workplace that bends over not only backwards, but forwards don't have to. Within the driver-side door there are four and sideways as well, to suit. So the driver doesn't have to.

> MAN EasyControl: four control buttons reachable from outside the vehicle for maximum comfort.

Innovative MAN SmartSelect multimedia control

TOP-CLASS DRIVER'S CAB.

The heart of the MAN TGM and TGL trucks is Depending on the cab version, these compartments, the driver's cab. We've reimagined the cab from floor the refrigerator and other drawers come in various sizes. to ceiling - because comfort in the cab means easier As a result, the cab is always perfectly geared towards workflows and fast completion of your delivery jobs. drivers' different needs. Ideal conditions for higher driver motivation, and that translates to an investment that pays you daily returns. One feature is even an absolute first: the trailblazing The controls of the MAN TipMatic® automatic gear shift MAN SmartSelect system, which was developed together system situated directly on the steering column stalk with our customers, makes using the multimedia system is just one example.

integrate stowage space and compartments which make music, cameras and more can be selected via a userit easier to keep the cab tidy. These range from overhead friendly dial with hand rest. There's so much more to compartments above the windscreen to various storage discover in our driver's cabs, so get in, get comfortable solutions in the central area or by the passenger seat. and enjoy all the possibilities.

child's play even in demanding driving situations. Here, too, comfort was our inspiration for eliminating the touch-The additional room is put to good use in both trucks to screen. With MAN SmartSelect, functions such as maps, The MAN TGM and TGL offer exactly the support you and your drivers are looking for: turn support, lane change support (LCS)*, video turn support and 360° camera system, adaptive cruise control (ACC), lane departure warning (LDW), lane return assist and many other safety and assistance systems can prevent or lessen the consequences of accidents, which can in some cases entail expensive repairs and major losses of time. EVERYTHING IN ORDER.

The traffic situation on city roads as well as for long The controls for the MAN media system and MAN contribution to making drivers' lives less complicated the transport. and less tiring.

distances is becoming ever more demanding and complex. MAN SmartSelect are simple to use. All of the displays And when off-road, you're always facing new challenges and controls throughout the vehicle follow a single that call for a driver's full concentration. It was all the more concept. Symbols, colours, usage, alert and warning important to us then to make the cockpit as driver-friendly sounds as well as design are consistent throughout and organised as possible. Displays and controls are now the cockpit. The quick-selection keys are individually separated from one another spatially. Reading distances programmable and accelerate workflows. Not to mention and reachability are thus ergonomically optimised: data is notices can be played in any of 30 different languages. set at a farther distance, making it easier to grasp, functions For voice command operation, a choice of six languages are colour-coded, and buttons and switches are within easy is offered. All of it intuitive to use. After all, the controls reach. The focus is clearly set on the most important and especially the cutting-edge digital components areas. The driver's view can easily go between the road and were developed by drivers for drivers. This way the driver the instruments, without fear of distraction. Just another can see to the truly important things: the cargo and

Theory times experience: the controls for the MAN TGM and TGL are the result of combining the latest scientific analyses with insights from intensive on-road tests with drivers.

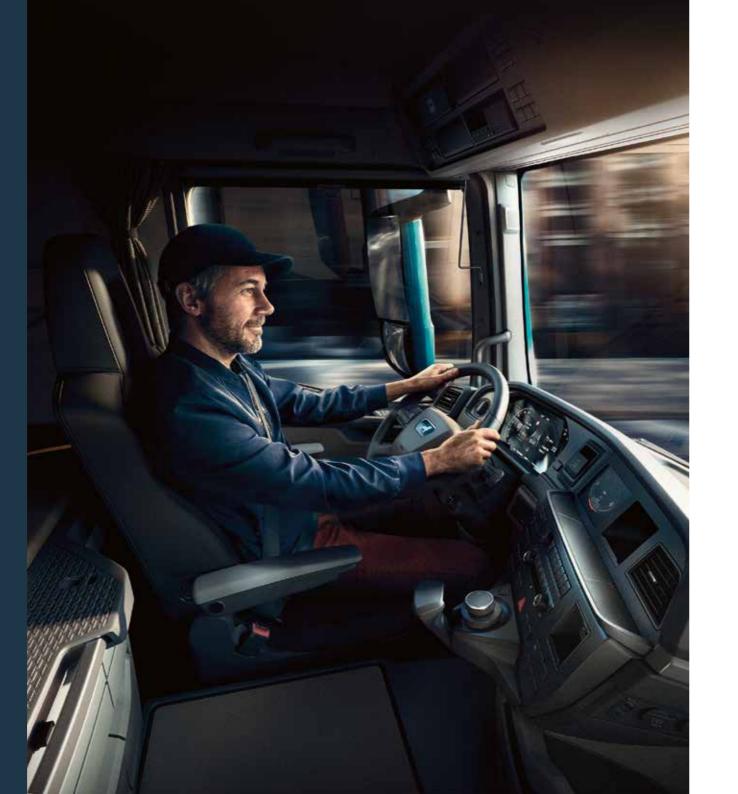

Freely programmable direct access buttons fitted with touch sensors

EVERYTHING UNDER CONTROL.

Fully redeveloped, the gear controls for the automatic transmission have been placed in the right-hand steering column stalk. That not only frees up space between the seats, as the usual console between the seats is no longer needed, but also improves ergonomics and safety. Close at hand as well - to the right of the combi-dashboard - is the control for the electric handbrake. This means it is optimally positioned with respect to gear controls and the ignition. It can be operated at any time but is now also automatically activated when the vehicle is parked and released when it moves off.

DRIVING SMART.

With navigation, radio (from standard to digital), video, telephone and more tailored to trucks, the infotainment system of the MAN TGM and TGL is a communication and multimedia hub. It is available in five different variants, from entry-level to Navigation Professional. The 7-inch or 12.3-inch display - both with brilliant HD resolution - makes for great viewing. Direct access buttons and a USB input connection are part of the standard fittings, and from Advanced level up to two smartphones can be paired.

The infotainment system can be operated either via a classic control system with buttons or via MAN SmartSelect (can be combined from version Advanced 7 inch). Throughout, familiar usage meets innovative comfort. The result is one you can see and feel, too, as high-quality surfaces make every journey with the MAN TGM and TGL tangibly special.

MAN PUTS SAFETY FIRST, EVERY TIME.

MAN has the right cab for every need – and maximum safety, comfort and ergonomics travel with you wherever you go. Our cabs are designed for fatigue-free, focussed driving, relaxing breaks and maximum passenger protection.

All of the cabs offer optimum safety thanks to a range of features, including the mirror system comprising main and wide-angle mirror, large kerb mirror and front mirror. Or the innovative MAN OptiView digital mirror-replacement system which provides the driver with the optimal overview of the traffic situation. The heated windscreen (as an option) ensures an unobstructed view even at the coldest times of the year.

Second passenger seat for the MAN crew cab

PACKED WITH INNOVATIONS.

In deployments that require space for a whole crew, it's in Even the stair unit represents a step up: the wide, non-slip

passenger seat, it offers space for up to seven people as well as maximum convenience and functionality.

a size class of its own: the MAN crew cab for the steps, optionally available with lighting, are designed MAN TGM and TGL trucks takes you into new dimensions. for safety. The internal fittings have everything covered, too. The crew cab is not just a practical option, though: The MAN crew cab comes into play whenever teamwork is its elegant front is designed in the same style as the a must. Equipped with a comfortable row of four rear seats MAN TG trucks. Aerodynamically optimised features minifeaturing three-point seat belts and an optional second mise fuel consumption and improve cost-effectiveness.

HIGH PERFORMERS.

If you want to get to the top, you need drive and efficiently The digital service Perform assists drivers in optimising deployed strength. MAN offers the tried-and-tested MAN D08 the economy of their driving styles. There are now more engine for the MAN TGM and TGL trucks. This high per- functions and information available for evaluating the former brings efficiency and trusted MAN reliability to make efficiency of the vehicle deployment. Perform evaluates all your new truck a strong and cost-transparent member of the relevant vehicle data with respect to the economic your business for a long time to come. In particular, thanks efficiency of the driving style. The service expands the to SCR and optimised thermal management, all the MAN deployment analysis data of Essentials (e.g. average fuel engines are ideally prepared for the stricter emissions consumption), additionally providing important vehicle data limits of Euro 6.

Strong on performance and light on emissions? Here, enhancing motor efficiency was the top priority. With the As support for every journey, we also offer the current vehicles, MAN proves you can in fact have it both MAN EfficientCruise® service. This GPS-based speed ways. However, at the end of the day, what really counts is control system analyses the route and automatically how much cargo can be transported from A to B.

and waiting to help you get the most out of our high- system as well as applicable speed limits. Just one of the performance engines at all times.

about utilisation of cruise control or the service brake. for example.

determines the most cost-effective driving style and speed. A brand-new aspect is the fact that it can now Furthermore, we also have a variety of digital tools ready take into consideration the route selected in the navigation many MAN ideas to help you get your business where it wants to be.

THE MAN TGM AND TGL ARE EVEN INNOVATIVE WHEN THEY'RE STANDING STILL.

With their innovative braking technologies, MAN trucks make everyday driving as safe as possible. The EBS electronic brake system enhances braking performance, whatever the situation, while the off-road ABS function improves braking on unpaved and slippery surfaces if necessary. Meanwhile, the traction control system and the electronic stability program (ESP) help to make driving safer as standard.

As even a brief moment of distraction can lead to an accident, MAN has also developed the anticipatory emergency brake assist (EBA). It gives drivers an advance warning of impending collisions, providing them with valuable time to react. In an emergency, it even initiates braking itself.

TRACTION MATTERS.

In the off-road segment, often jobs don't just cover good Permanent mechanical all-wheel drive roads, but involve unmade tracks and uneven terrain as Permanent front-axle drive with longitudinal differential well. Efficiency is a prime consideration here too.

Thanks to the two innovative MAN all-wheel drives, the axle articulation MAN TGM and TGL trucks can handle a wide range of • The permanent all-wheel drive is recommended for transport jobs off tarmacked roads. Depending on the uses you have in mind, there are two versions to choose from.

Engageable mechanical all-wheel drive

- For occasional use on challenging terrain where high traction and good axle articulation are needed
- Traction jobs that are lengthy or require higher speeds

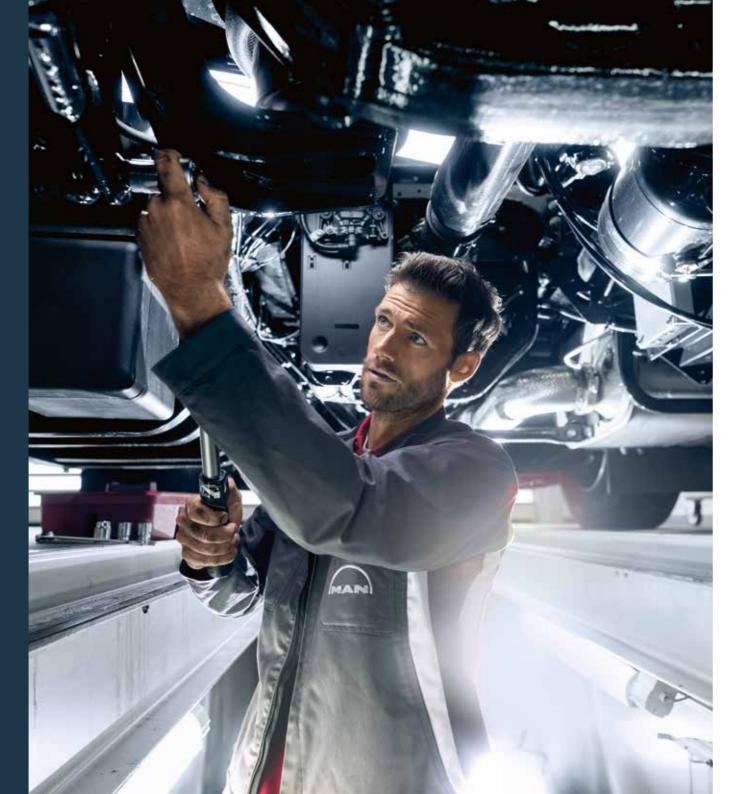

- For those who frequently need high traction and limited
 - longer jobs on relatively flat surfaces where grip changes substantially (e.g. winter service)

WORKING NON-STOP.

Only a truck that runs is a good truck. Unplanned downtime and the associated loss of time and earnings are something we'd all like to do away with for good. The MAN TGM and TGL have got your back there too. Right from day one, it brings the ultimate quality synonymous with MAN to its work. So much so that it's hard to get it to stop. If you need us, however, we're ready and waiting. When you're at a standstill, we will get you back on track as quickly as possible. We will move heaven and earth to keep you mobile. In short, where there's a MAN employee, there's a way.

MAN ServiceCare, for instance, impresses with its forward-looking planning and smart bundling of service appointments. Proactive servicing management is part of MAN DigitalServices and informs the workshop ahead of time if vehicle analyses indicate action is needed. You are then contacted by email and can arrange a service appointment even before downtime occurs. When it comes to financing, too, you can rely on MAN: MAN Financial Services supports your needs and makes sure you stay mobile. You can even cover bottlenecks and react flexibly to higher demand thanks to truck leasing from MAN Rental. We've got it covered, so that your head stays clear for the road in front.

RELIABLE, AGAIN.

inspections rose yet again. Our reliability rests on many weight and more available load capacity. components. The first is our continuously growing LED range for the lighting systems of the vehicle.

This news bears repeating: the TÜV report on utility Another is our dedication to the little things. For instance, vehicles has again confirmed that the MAN trucks offer when it comes to the electricity supply of the MAN TGM by allowing customer requests to be easily incorporated impressively high quality. In particular when it comes to and TGL we pride ourselves on laying not one wire more and enabling quick repairs thanks to prefab sets. Together, long-term reliability, our fleet of four- and five-year-old than your configuration needs. The wires themselves are trucks occupied top spots. Our previous awards have only now protected by even more flexible and elastic materials, system with higher performance overall. served to whet our appetite to do even better. Successfully and the number of joints has been cut. We also reduced so, too, as the share of defect-free vehicles in the main the wire thickness overall, which in turn means less

The modular wiring concept offers additional advantages the result is shorter downtimes and a vehicle electrical

NEXT EXIT:

Wherever the road takes you, our solutions are just around the corner. We're available at 1,700 service points worldwide, from early until late. We are always up to date and know what's driving you: with systematic analysis of vehicle data and customer enquiries as our basis we're always striving to develop new future-oriented digital solutions. Continually transmitted vehicle data and intelligent data analyses are the foundation for the ever expanding range of exclusive and customer-tailored digital solutions: solutions that enable you to get the most out of your new MAN truck no matter whether you're the driver, fleet manager or business partner!

In short, your challenges are our challenges and we're always working on modern and tailored answers to your questions even before you've asked them. Personal, competent and according to your priorities.

SERVICE AS YOU LIKE IT -PERSONAL AND DIGITAL.

Could your company also benefit from the increasing digitalisation taking place in logistics? We are convinced it can. That's why we would like to give you a brief insight into how you can better master the most pressing challenges of your industry with smart digital solutions.

working environment in the logistics industry particularly challenging. Every vehicle in your fleet must be operated as economically as possible. This requires economical driving behaviour as well as effective maintenance management. With a networked truck, an overview of all relevant data directly accessible from your desk and useful digital services, you free up capacity to concentrate fully on your core business. You benefit from:

- more efficiency,
- simplified work processes and
- lower costs.

The best part: it's already a reality.

With MAN DigitalServices, you can begin straightaway.

Here's how to get started in the digital world: The free Essentials basic package comprises key basic elements from many of our services to get you off to an easy start. Once your fleet vehicles have been set up and are visible in our administration area, you can get going with Essentials. You now have access to the fleet monitor and Above all, the high cost and time pressure make the the deployment analysis with many useful functions such as the current vehicle location on a map, driving history covering the last ten days and a deployment analysis at

The frame concept makes it especially easy to Whichever body you choose, the MAN TGM and TGL boast excellent handling, thanks in part to the low-friction, addition to tried-and-tested parabolic leaf springs, the the body manufacturers. ECAS air suspension guarantees outstanding ride comfort and stability. For instance, it is easy to adjust the level to For MAN TGM: Allison six-speed fully automatic different loading bay heights using a hand-held controller. Along with the established fittings and technical features for In contrast to manual and automated gearboxes, with connecting the body, the MAN TGM and TGL come with the following innovations:

- the dashboard
- Electrical and electronic interfaces for sharing data with the body now optionally available behind the cab as well
 The torque converter smoothly multiplies the engine's as in the usual position behind the engine hood
- party apps with body builder functionality
- The frame is connected in the same way as on the previous generation: existing body concepts can be utilised without any adjustments

user programs. Only when you find the perfect combination into the technical development environment and business processes of MAN. This is a central pillar of our body compatibility philosophy. The body builder portal ABBI (www.abbi.man-mn.com) is one way in which we do this. mount attachments and bodies guickly and cost-effectively. A fast source of information, it allows the delivery of the For body functionalities, there are numerous optional complete vehicle to be planned and calculated with greater precision and certainty. The Bodybuilder website low-noise hypoid axles and cleverly designed chassis. In also supports a smooth process involving both MAN and

Allison automatic gearboxes there is no interruption in power during gearshifts. In particular when the vehicle is • Exclusive panel of switches for body-related functions on moving off and accelerating, the engine's power output and torque are transmitted to the wheels with almost no wear.

torque and prevents interruptions in the tractive power MAN media system with the option of integrating third-during gearshifts. This means that fully automatic gearboxes accelerate faster than manual or automated gearboxes and exhibit outstanding moving-off behaviour. The optionally integrated retarder assists in braking the vehicle with little wear on the brake system. This leads to better control and manoeuvrability in addition to optimised driving performance.

Without mechanical clutches there is less wear on all parts of the driveline. The fully automatic gearbox itself is subjected to very little wear. It requires no more than a regular oil and filter change.

PTOs with various transmission ratios in two installation locations available. Up to two PTOs can be operated simultaneously while the vehicle is stationary or in motion. The gearbox control unit regulates how and when the PTOs respond and monitors the operating conditions.

^{*} MAN Individual package

AND HERE ARE YOUR ASSISTANTS.

Lane Change Collision Prevention Assist for MAN TGM

The MAN Lane Change Collision Prevention Assist uses radar sensors to monitor the areas to the left and right of the vehicle's lane. If the sensors detect that changing lanes would result in a dangerous situation, the driver is warned in good time. If the vehicle nevertheless leaves the given lane - also if the turn indicator has been actuated - the Lane Change Collision Prevention Assist steers it back into the lane by means of a corrective steering torque.

Lane change support (LCS) for MAN TGM

Lane Change Support LCS monitors the lanes on the right and left next to the vehicle with the aid of radar sensors from a driving speed of 50 km/h - up to approx. 30 m towards the front and up to approx. 80 m towards the rear. If the sensors detect a dangerous situation when the vehicle is changing lanes, the driver is warned in good time so that they can prevent a potential collision with other vehicles.

Lane departure warning (LDW)

An acoustic signal warns the driver if they drift out of their departure. lane. Available on demand in a version that cannot be switched off.

Lane return assist (LRA)

If the truck departs from its lane, corrective steering guides the vehicle back. The vehicle is automatically steered until it reaches the normal lane position; it is not kept in its

Turn Assist for MAN TGM

Turn Assist monitors the difficult-to-see side area next to the vehicle (co-driver's side) with the help of radar sensors driver is warned in good time so that they can intervene and prevent a possible collision with other road users.

MAN AttentionGuard

principle of lane monitoring. Within the limits of the system, starting at a speed of 60 km/h it detects reduced driver by automatically dipping the headlights. alertness in good time. A visual as well as acoustic warning supports the driver in refocusing their concentration on the road – thus we help reduce a possible accident due to lane

MAN AttentionGuard is an attention assistant based on the

Emergency brake assist (EBA)

The driver is warned of an imminent collision and the vehicle brakes automatically in an emergency. Available on demand in a version that cannot be switched off.

ACC Stop&Go

The ACC with Stop&Go feature automatically controls speed and the distance from the vehicle in front. The desired speed is maintained without the driver having at road speeds of up to 30 km/h. If the sensors detect a to operate the accelerator. The truck automatically dangerous situation when the vehicle is turning off, the brakes until it comes to a standstill and moves away again after short stops.

High-beam assist

Depending on the driving situation, high-beam assist optimises use of the main beam. It prevents the drivers of oncoming vehicles or vehicles in front from being dazzled

Side camera system (SCS)*

The side camera system is an integrated camera system for assisting in turn-off procedures. It makes it easier for the driver to observe those areas next to the vehicle that are difficult to see (co-driver's side). The video feed is transmitted to an optional additional monitor (only for vehicles with conventional mirrors) on the co-driver A-pillar or to the media display.

Video Turn Assist (VTA)*

Video Turn Assist expands object recognition by comparison with the side camera system (SCS): Objects are detected in an area of 2.5 m x 6 m to the right of the vehicle and the monitor display is supplemented by a warning to the driver in the form of an acoustic signal from the loudspeaker built into the vehicle. The video feed is transmitted to an additional monitor (only for vehicles with conventional mirrors) on the co-driver A-pillar. In addition, an optical display lights up and an acoustic signal is emitted.

360° view assistant BirdView*

The camera system for a 360° live view 'from above' seamlessly displays an area of up to four metres around vehicles with fixed bodies (e.g. fire-fighting, beverage or waste-disposal vehicles). Stitch-and-blend technology combines four camera views (front, rear, left and right, in full-HD quality) to a single image from the bird's-eye perspective. A special feature of the system is - depending on the driving situation - self-adjusting image sections at manoeuvring speed (≤ 40 km/h), when the turn indicator is set (lane change) and when reversing.

^{*} MAN Individual package

Some of the features illustrated in this brochure are not part of the production series generally described here.

Both the vehicle's air conditioning system and refrigerator contain fluorinated greenhouse gases (R134a / GWP 1430 with up to 1.15 kg; 1.6445 t CO₂ accordingly).
